

Instruction for HP02 Refill Cartridge

The capacity of the black cartridge and the color cartridge is different. Black one only can be filled with 30-40ml and color one 10ml.

Step 1: Use syringe to pump 10ml ink. Take off the rubber of the filling hole as pictures show below

(1)

(2)

Step 2: Insert the syringe with ink into the ink filling hole. Draw the plunger of the syringe to a certain height. Then loose the plunger. In this way, the ink can flow into the cartridge directly.

(3)

(4)

Step 3: When filling the black cartridge, pump 30ml ink and the filling process is the same as the color one.
